

Armor 70 WP

FUNGICIDE

DESCRIPTION:

A systemic fungicide that prevents and controls the growth of fungal diseases in rice, fruit crops, vegetables, tobacco and other crops.

CONTENT:

Thiophanate methyl 70%

FEATURES & BENEFITS:

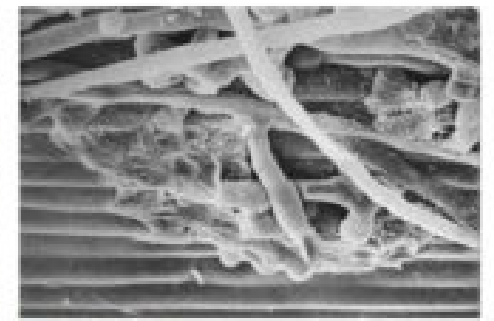

- Has curative action properties that can prevent the spread of disease even if it has already infected a plant.
- Has a long-lasting effect and can remain effective for 14 days.
- Armor 70WP can be applied via soil drenching as it can easily enter through a plant's root system.

TARGET DISEASES:

Damping-off, Leaf Blight, Basal and Neck Rot, Leaf Blotch, Powdery Mildew, Smut and Botrytis Rot

Fungal growth inside plants - before application of Armor 70 WP
